Dear parents, guardians, and students,

This summer, we would like to make sure that the students of Monson High School are well-prepared for next year's math courses. Therefore, we are offering the opportunity for students to practice their math skills through Khan Academy.

HONORS MATH COURSES: Any student enrolled in a mathematics honors course is **REQUIRED** to earn 2500 **mastery points** in the Khan Academy "Get Ready for..." course that corresponds to the course they are taking next school year. This Khan Academy assignment will count as the first quiz grade of the year for all math honors courses. We estimate that students may need to spend a total of 5 hours practicing to reach 2,500 mastery points.

ANY STUDENT may choose to earn **EXTRA CREDIT** for the upcoming school year in a mathematics course by earning 1500 **mastery points** in the Khan Academy "Get Ready for..." course. Honors students may choose to earn extra credit for the upcoming course by earning an additional 1500 mastery points, over the required 2500 mastery points.

Mastery points are tracked at the top of the course home page on Khan Academy and are earned by completing practice activities, quizzes, and unit tests.

Entering this course for 2025-2026:	Click on the appropriate link for summer work:
